

Vehicle Instrument Cluster Speedometer

This is a vehicle instrument cluster with an analog speedometer. The speedometer is calibrated in kilometers per hour (km/h) and ranges from 0 to 100 km/h.

Product Overview

Vehicle Instrument Cluster

This vehicle instrument cluster is designed to provide clear, reliable real-time feedback to the driver. It features a classic analog speedometer calibrated in kilometers per hour, complemented by an integrated digital display for essential mileage tracking. The unit is housed in a durable black plastic enclosure, making it a robust replacement or upgrade component for automotive applications.

Technical Specifications

Speedometer Range

100 km/h

Maximum Speed

Speed Calibration	km/h
Odometer Reading	85 km

Features & Construction

Housing Material	Black Plastic
Indicator Lights	Speedometer, Odometer, Trip Meter, Warning Indicators
