

Vehicle Lifting Hydraulic Bottle Jack

Heavy-duty hydraulic bottle jack designed for lifting vehicles and heavy equipment. Features a durable steel construction with a heat-treated extension screw for adjustable height.

Product Overview

Professional Hydraulic Bottle Jack

This heavy-duty hydraulic bottle jack is engineered for reliable performance in demanding environments, including automotive repair, construction, and industrial settings. Constructed from durable steel, it features a heat-treated extension screw that allows for precise height adjustments during lifting operations. Its robust design ensures maximum stability and lifting power, making it an essential tool for professional technicians and heavy equipment operators.

Technical Specifications

Material	Durable Steel
Adjustable Height	Yes
Key Features	Heat-treated extension screw, Heavy-duty construction, Industrial grade

Applications

Common Applications

- Automotive repair
- Construction sites
- Industrial equipment maintenance
