

Vehicle Recovery Rope 33000 lbs Capacity

This recovery rope has 30% elasticity. It is lighter and has better strength than steel ropes.

Product Overview

High-Performance Recovery Solutions

This professional-grade recovery rope is engineered for reliable vehicle extraction in the most demanding environments. Featuring an impressive 30% elongation, it provides superior elasticity compared to standard nylon snatch straps. Each unit is built for heavy-duty performance, making it an essential tool for off-road enthusiasts and fleet operators handling trucks or large equipment.
