

Vehicle Recovery Strap

This heavy-duty recovery strap is designed for vehicle recovery and towing. Constructed from high-strength webbing material, it offers durability and features reinforced loops at both ends for secure attachment to recovery points.

Product Overview

Heavy-Duty Vehicle Recovery Strap

This high-strength recovery strap is engineered for reliable vehicle extraction and towing operations. Constructed with durable, heavy-duty webbing material, it ensures maximum resilience under load. Equipped with reinforced loops at both ends, the strap allows for secure and efficient attachment to standard recovery points, making it an essential tool for professional recovery services and off-road applications.

Technical Specifications

Design Features

- High-strength webbing construction
