Product Overview

Versatile Vehicle Cargo Solution

This roof cargo carrier is engineered to significantly expand vehicle storage capacity, making travel more convenient and organized. Featuring a streamlined, aerodynamic profile, it minimizes wind resistance and noise for a quieter driving experience. Constructed from non-toxic, durable materials, the carrier offers robust resistance to extreme temperatures, ensuring long-term reliability in various climates.

Technical Specifications

Maximum Capacity

600 L

Volume Capacity

Material Performance

High-Temperature Resistance, Antifreeze Resistant, Non-Toxic Material, Weather Resistant

Installation and Compatibility

Installation

- Self-designed mounting accessories included
- Convenient and user-friendly installation system
- Compatible with most standard vehicle roof racks

Design and Safety

Design Features

Aerodynamic Profile • Low Noise • Lockable Security
