

Vehicle Suspension Shock Absorber

This shock absorber dampens and controls vehicle suspension movement. It is made with durable materials to withstand road conditions and provide long-lasting performance.

Product Overview

High-Performance Suspension Control

This vehicle shock absorber is expertly engineered to dampen and control suspension movement for enhanced vehicle stability. By utilizing a high-quality hydraulic or gas-filled cylinder, it provides superior resistance during compression and extension cycles. The robust construction ensures durability under harsh road conditions while effectively minimizing noise and vibrations for a significantly smoother ride.

Technical Specifications

Installation Compatibility

- Integrated mounting points
- Universal compatibility design
- Easy installation

Key Performance Indicators

1 Level

Vibration Damping

1 Level

Noise Reduction

Technical Parameters Overview

Parameter	Focus Area
Cylinder Diameter	Performance Regulation
Stroke Length	Travel Range
Damping Force	Dynamic Control
Construction Material	Durability Standards

Mechanism Type

Hydraulic, Gas-filled
