

Vented Brake Disc and Hub Assembly

This brake disc and hub assembly is designed for automotive applications. It features a vented brake rotor to improve heat dissipation and a multi-bolt hub for mounting.

Product Overview

High-Performance Vented Brake Disc Assembly

This vented brake disc and hub assembly is engineered for reliable automotive braking performance. The design features a vented rotor structure, which is essential for efficient heat dissipation during operation. The integrated hub includes pre-installed studs, ensuring a secure fitment to the vehicle's axle and wheel assembly.
