

Vented Industrial Component Housing

This gray, round industrial component features a vented top and a rectangular recess. The component is constructed in two parts, suggesting it houses internal mechanisms or electronics.

Product Overview

Versatile Industrial Housing Solution

This vented industrial component housing is designed to protect sensitive internal mechanisms and electronics within demanding environments. Featuring a durable, two-part molded plastic construction, it offers a robust solution for housing various components. The integrated circular venting pattern ensures effective airflow, while the sleek, gray finish provides a professional appearance suitable for diverse industrial applications.

Physical Characteristics

Material	Molded Plastic
Construction	Two-part housing
Color	Gray

Design Features

External Features

- Rectangular front recess
- Horizontal ridge detailing
- Two-part assembly

Model Identifier

KD-112

Ventilation	Circular vented pattern on top
