

# Ventilated Refrigerated Counter with Stainless Steel Construction

This ventilated refrigerated counter is a professional refrigeration solution for commercial kitchens. Constructed from stainless steel, it features a forced-air cooling system and adjustable shelves for flexible storage.

## Product Overview

### Professional Ventilation Refrigeration

The THY23 ventilated refrigerated counter is a professional-grade refrigeration unit tailored for commercial kitchens and demanding food preparation environments. Built with high-quality stainless steel, it provides a hygienic, durable work surface combined with an efficient forced-air cooling system. Its intelligent design features digital temperature control and automatic defrosting to ensure consistent storage conditions and ease of maintenance for busy culinary professionals.

## Construction and Design

Material	Stainless Steel
Design Features	Compact, Insulated Doors, Robust Construction

## Technical Specifications

### Maintenance

- Automatic defrost function
- Adjustable shelving

Cooling System	Forced-air ventilation
Control System	Digital temperature control
