

Ventilation Grille with Circular and Rectangular Pattern

This ventilation system component features a metallic grille with both circular and rectangular patterns. The design promotes efficient airflow and ventilation.

Product Overview

Dual-Pattern Ventilation Grille

This ventilation grille is designed for optimized airflow management in HVAC and ventilation systems. It features a versatile design with both circular and rectangular perforation patterns, allowing for balanced air distribution. Constructed from durable metal, it is suitable for professional installation in commercial or industrial air conditioning setups.

Design & Construction

Material	Metallic
Pattern Styles	Circular Pattern, Rectangular Pattern, Solid Section

Application

Component Type	Ventilation Component • HVAC Accessory
Primary Application	Air Conditioning and Ventilation Systems
