Product Overview

Professional Precision Vernier Caliper

This vernier caliper features a robust fine adjustment mechanism to ensure highly precise positioning and measurement accuracy. Engineered for versatile use, it supports four-way measurement capabilities including outside diameter, inside diameter, depth, and step. Constructed from durable, hardened materials, this tool is ideal for demanding applications in engineering, machining, and quality control.

Technical Specifications

Metric Resolution	0.02 mm
Imperial Resolution	0.001 in

Construction & Design

Surface Finish

- Chrome plated main scale
- Chrome plated vernier scale
- Hardened measuring plane

Material Options	Stainless Steel, Carbon Steel
------------------	-------------------------------

Capabilities

Measurement Modes

OD Measurement • ID Measurement • Step Measurement • Depth Measurement

Customization

Special Requirements	Yes
