

Versatile Tread Bicycle Tire

This bicycle tire features a tread pattern designed for versatile use on various surfaces. The tire exhibits a robust construction with a focus on durability and grip.

Product Overview

Versatile Performance Tire

This bicycle tire is engineered for versatility, featuring a tread pattern designed to perform across a variety of surfaces. Its robust construction prioritizes durability and reliable grip, making it a dependable choice for diverse riding conditions. The design balances low rolling resistance on smooth pavement with sufficient traction for loose terrain, while the reinforced sidewall offers enhanced protection against punctures and abrasions.

Technical Specifications

Tread Pattern	Closely spaced blocks for low rolling resistance and traction
Key Features	Reinforced Sidewall, Puncture Resistant, Abrasion Resistant, Versatile Tread

Compatibility

Rim Compatibility	Standard bicycle rims
