

Vertical Bitumen Storage Tank

This vertical bitumen tank provides a minimal footprint and corrosion-resistant body. It is equipped with heating and temperature control systems for convenient and safe bitumen storage.

ADDITIONAL IMAGES

Product Overview

A vertical bitumen tank designed for the storage and heating of bitumen, featuring an insulated cylindrical design for optimal temperature control.

Industrial Bitumen Storage Solution

This vertical bitumen tank is a robust cylindrical storage container engineered for the specific requirements of road construction and asphalt production. It features a space-saving vertical footprint and is equipped with advanced heating and temperature control systems to maintain optimal bitumen viscosity. Designed for durability and ease of installation, it serves as a critical component in ensuring efficient supply flow for hot mix asphalt preparation and surface sealing projects.

Technical Specifications

Capacity

35 m³

Minimum Capacity

80 m³

Maximum Capacity

Model Series

35 ~ 80

Key Features

Core Design Benefits

Vertical Layout, Minimal Footprint, Corrosion-Resistant, Integrated Heating System, Temperature Control, Easy Transportation

Applications

Industry Applications

- Asphalt Mixing Plants
- Road Construction
- Pavement Repairs
- Hot Mix Asphalt (HMA) Preparation
- Surface Sealing Projects
- Asphalt Patching
