Product Overview

Industrial Vertical Drilling Solutions

This vertical drilling machine is engineered for precision and efficiency in demanding metalworking and industrial applications. Built with a robust construction for maximum stability, the unit features a powerful motor and a coolant system designed to extend tool life while ensuring superior workpiece finish. It offers high operational flexibility through adjustable worktables and variable speed control, making it a versatile choice for manufacturing facilities and workshops.

Key Features

Core Features

- Variable speed control
- Integrated coolant system
- Emergency stop button
- Adjustable worktable
- Transparent operator guard

Certifications & Compliance

CE Certified

Technical Details

Available Models

WD5040 • WD5050

Suitable Applications

- Metalworking
- Woodworking
- Workshops
- Educational institutions
