

Vertical Electric Anchor Capstan

Vertically mounted with a cast steel wrapping head. It delivers a 3 to 15T pull capacity at the first layer and a maximum speed of 20m/min.

Product Overview

Vertical Electric Anchor Capstan

This vertical anchor capstan is engineered for reliable and efficient marine anchor handling operations. It features a robust cast steel warping head and can be configured with either electric or hydraulic drive systems to suit specific vessel requirements. Designed for durability in harsh environments, it includes local control options for enhanced operational safety and ease of use.
