Product Overview

Versatile Vertical Vacuum Solution

This vertical external vacuum packaging machine is specifically engineered for handling heavy-duty, non-invertible bags that traditional machines cannot process. By providing a vertical sealing solution, it seamlessly integrates with existing packaging configurations like barrels and boxes to preserve product integrity. It is an ideal choice for industries requiring robust sealing for items such as rice, metal components, agricultural products, and bulk liquids.

Technical Specifications

Suitable Industries

- Food Processing
- Electronics
- Pharmaceuticals
- Agricultural Bulk

Machine Type

Vertical External Vacuum Packaging

Build Quality

Stainless Steel, Robust Frame, Wheeled Base

Control & Operation

Control Panel Features

- Pressure Gauge
- Emergency Stop Button
- Adjustable Vacuum Timer
- Adjustable Sealing Parameters
