

Vertical Fall Arrest Lifeline

This vertical lifeline provides a secure and reliable fall protection system for workers at heights. It features a durable, high-strength rope and a rope grab mechanism for smooth movement and automatic locking in case of a fall.

Product Overview

Professional Vertical Fall Arrest System

This high-strength vertical fall arrest lifeline is designed for secure height operations, featuring a durable polyamide rope construction. The system includes an integrated energy absorber to mitigate impact forces and a reliable sliding rope grab mechanism for enhanced safety. Engineered for durability and abrasion resistance, it provides an essential fall protection solution for workers in industrial and climbing environments.

Technical Specifications

Rope Length	15.24 M
Rope Diameter	14 mm
Material	Polyamide
Color	Yellow, Black

System Components

Kit Components

- 1x Rope Grab
- 1x Snap Hook
- 1x Energy Absorber
