

Vertical Glue Labeling Machine for Bottles

This vertical machine applies non-drying glue labels to plastic and glass bottles. It is suitable for packaging lines in the medicine, food, chemical, cosmetic and light industries.

Product Overview

High-Efficiency Vertical Labeling System

This vertical non-drying-glue labeling machine offers a robust, stainless steel solution for high-precision labeling of cylindrical containers. Featuring an integrated PLC control system and a stepping motor-driven feeding mechanism, it ensures reliable operation with automatic detection of bottle presence. The system is designed for industries requiring hygienic, fast, and durable labeling, offering clear printing capabilities via an integrated heat transfer printer.

Technical Specifications

Control System	Siemens PLC
Interface	Multicolor touch screen
Feeding Mechanism	Stepping motor

Features

Key Capabilities	Automatic bottle detection, No-label-sticking-without-bottle, Mildew repellent, Secure adhesion, Heat transfer printing
------------------	---

Construction

Construction Highlights

- Stainless steel construction
- Hygienic design
- Electric-mechanical integrated structure
- Emergency stop functionality
- Protective guarding
