

Vertical Impulse Sealer for Poly Film

This vertical impulse sealer is designed for sealing polyethylene and polypropylene films. It features an adjustable height stand and a sealing bar for creating airtight and watertight seals on various bag sizes.

Product Overview

Industrial Vertical Impulse Sealer

This vertical impulse sealer is engineered for high-performance sealing of polyethylene and polypropylene films. Featuring an adjustable height stand and a precision sealing bar, it ensures consistent, airtight, and watertight seals across a variety of bag sizes. This unit is an ideal solution for industrial packaging applications that demand reliability and operational flexibility.

Technical Specifications

Key Features

- Adjustable height stand
- Airtight seal capability
- Watertight seal capability
- Industrial-grade construction

Compatible Materials	Polyethylene, Polypropylene
Sealing Type	Impulse Sealing

Performance Metrics

Application Focus

Industrial Packaging • Consistent Sealing
