

Vertical Inline Centrifugal Pump for Industrial Applications

This centrifugal pump is designed for efficient fluid transfer in industrial settings. It features flanged connections for secure installation and is suitable for HVAC, water circulation, and pressure boosting.

Overview

Industrial Fluid Transfer Solution

This vertical inline centrifugal pump is engineered for high-efficiency fluid transfer across a wide range of industrial applications. Featuring a robust, durable construction with secure flanged connections, it is designed for direct coupling to an electric motor to ensure reliable operation and minimal maintenance requirements. It is an ideal choice for demanding environments such as HVAC systems, large-scale water circulation, and industrial pressure boosting.

Technical Specifications

Design Type	Vertical Inline Centrifugal
Connection Type	Flanged
Coupling Method	Direct Coupled

Applications

Suitable Applications	HVAC Systems, Water Circulation, Pressure Boosting, Industrial Fluid Transfer
-----------------------	---

Key Features

Maintenance

Minimal Maintenance • Robust Construction • Reliable Performance
