

# Vertical Inline Centrifugal Pump for Water Boosting and HVAC

This vertical inline centrifugal pump is designed for water boosting, liquid transfer, and HVAC systems. Its close-coupled design ensures compact installation and ease of maintenance.

## Product Overview

### High-Efficiency Vertical Inline Centrifugal Pump

This vertical inline centrifugal pump is engineered for high-performance fluid transfer in water boosting, liquid circulation, and HVAC systems. The space-saving, close-coupled design simplifies installation and maintenance in restricted areas. Built with corrosion-resistant materials, it ensures long-term reliability for clean, non-aggressive fluids across industrial, commercial, and residential sectors.

## Technical Features

### Primary Applications

- Water boosting
- Liquid transfer
- HVAC

Design Type	Vertical Inline Close-Coupled
Fluid Compatibility	Clean fluids, Non-aggressive liquids

## Performance

### Key Advantages

Energy Efficient • Compact Installation • Corrosion Resistant • Easy Maintenance
