

# Vertical Machining Center for Metal Cutting

This vertical machining center is designed for precision metal cutting. It features a fully enclosed workspace, a multi-axis control system, and an automatic tool changer for milling, drilling, and tapping.

## Overview

### Precision Vertical Machining Center

This vertical machining center is engineered for high-precision metal cutting applications, offering robust performance for milling, drilling, and tapping. Featuring a fully enclosed workspace and a multi-axis control system, it ensures operator safety and operational versatility. The machine's high-rigidity construction provides the stability required for consistent, high-quality results across a wide range of materials.

## Performance Metrics

Model ID

VC550i

## Key Features

### Design Highlights

Fully Enclosed Workspace • Multi-axis Control • Automatic Tool Changer • High Rigidity Construction

Operational Capabilities

Milling, Drilling, Tapping, Precision Cutting
