

Vertical Metal Band Saw for Cross Cutting

This vertical metal band saw is designed for cross-cutting metal materials with precision. It features a robust frame, advanced hydraulic system, and variable speed control for optimal performance.

Overview

Precision Vertical Metal Band Saw

This heavy-duty vertical metal band saw is engineered for high-precision cross-cutting of various metal materials. Built with a robust frame and an advanced hydraulic system, it ensures consistent and accurate performance for demanding industrial applications. The integration of a material handling system and variable speed control optimizes workflow efficiency, making it an ideal solution for operations requiring reliable, repeatable cuts.

Technical Specifications

Construction & Handling

- Robust heavy-duty frame
- Powered roller conveyor system
- Advanced hydraulic system

Model Number

GS480/260

Cutting Features

Cross Cutting, Variable Speed Control, Hydraulic Controlled Cutting

Safety & Compliance

Safety Equipment

Protective Guards • Emergency Stop
