Vertical Milling Machine

This vertical milling machine is designed for precision machining tasks. It features a robust frame, a vertical spindle configuration, and a control panel for adjusting machining parameters.

Overview

Precision Vertical Milling

This vertical milling machine is engineered for high-precision machining operations in demanding manufacturing environments. Featuring a robust frame and a vertical spindle configuration, it provides the stability required for consistent performance. The integrated control panel allows operators to easily adjust machining parameters, making it a versatile solution for a wide range of milling, drilling, and tapping applications.

Key Features

Design Highlights

- Robust frame construction
- Vertical spindle configuration
- Adjustable control panel

Capabilities	Milling, Drilling, Tapping

Application

Primary Uses

Metalworking • Manufacturing

Rooms 05–15, 13A/F South Tower, World Finance Centre, Harbour City, 17 Canton Rd, Tsim Sha Tsui, Kowloon, Hong Kong
