

Vertical Mixed-Flow Submersible Pump

This vertical mixed-flow pump is designed for industrial applications. Its submerged motor configuration ensures efficient cooling and reduced noise.

Product Overview

Industrial Vertical Mixed-Flow Pump

This vertical mixed-flow submersible pump is engineered for demanding industrial applications, offering a robust solution for fluid transport. Its submerged motor configuration ensures efficient cooling during operation while significantly reducing noise levels. Built with durable materials, the pump provides excellent longevity and resistance to corrosive fluids, making it suitable for handling liquids containing suspended solids.

Suitable Applications

Water Treatment, Chemical Processing, Industrial Fluid Handling

Technical Specifications

Key Features

- Submerged motor design for cooling
- Low-noise operation
- Corrosion-resistant construction
- Handles suspended solids

Pump Configuration

Vertical Mixed-Flow Submersible
