

Vertical Non-Drying Glue Labeling Machine

This machine is designed for applying non-drying glue labels to bottles. It is suitable for use in the packaging lines of industries such as medicine, food, cosmetics and light industries.

Overview

High-Efficiency Vertical Labeling

This vertical non-drying glue labeling machine is engineered for high-performance, precision application on cylindrical containers. Utilizing a Siemens PLC and a stepping motor, it ensures seamless automated operation with features such as automatic label feeding only when bottles are detected. Built with hygiene in mind, it provides durable, mildew-resistant labeling that is both neat and reliable for various industrial applications.

Technical Specifications

Control Architecture	Siemens Programmable Logic Controller (PLC)
Label Feeding Mechanism	Stepping Motor
Integrated Printing	Yes
Printing Equipment	Heat transfer printer

Features

Key Operational Benefits

- High efficiency performance
- Mildew repellent application
- Non-drying glue compatibility
- Zero unlabeled bottle detection
- Multicolor touch screen interface

Materials & Construction	Stainless Steel, Electric-mechanical Integrated
--------------------------	---

Industry Suitability

Recommended Industries

Pharmaceutical • Food • Cosmetic
