Overview

High-Efficiency Vertical Granule Mixer

This vertical plastic granule mixer is designed to provide rapid, consistent blending of plastic granules, color masterbatches, and mixtures of new and old materials. Featuring a durable stainless steel construction, it ensures non-polluting operation and easy cleaning for high-purity requirements. Its compact, mobile vertical design with integrated wheels makes it an ideal space-saving solution for plastic processing, chemical, and food industry applications.

Technical Specifications

Mixing Timer Range	30 min
Capacity Range	50kg - 300kg
Construction Material	Stainless Steel

Features

Industries Served

- Plastic Manufacturing
- Chemical Industry
- Food Industry

Key Features

Mobile Upright Design, Low Noise Operation, Auto Timer Control, Energy Efficient, Easy to Clean
