

Vertical Sandblast Cabinet for Surface Preparation

This vertical sandblast cabinet efficiently cleans parts. Its internal air blast gun, controlled via rubble gloves, directs a 100 PSI abrasive flow for rapid material cleaning.

Product Overview

Industrial-Grade Vertical Sandblast Cabinet

This high-efficiency vertical sandblast cabinet is engineered for professional surface preparation and finishing applications. Designed with heavy-duty steel construction, it features an intuitive dual-glove interface and a clear viewing window to ensure precision control. The system supports a variety of abrasive media, including glass beads, silica sand, and aluminum oxide, delivering a powerful 100 PSI maximum performance to meet rigorous cleaning and texturing requirements.

Performance Specifications

Operational Metrics

100 PSI

Max Pressure

5 CFM

Air Consumption

Working Pressure Range

40-80 PSI

Construction & Features

Build Quality

Heavy Steel Construction, Transparent Viewing Window, Double Side Doors

Compatibility

Supported Media

- Glass Beads
- Silica Sand
- Aluminum Oxide
