Product Overview

Professional Vertical Lifting Solutions

These heavy-duty vertical steel plate lifting clamps are engineered for secure and efficient material handling in industrial environments. Featuring a robust high-strength alloy steel construction, they include a safety locking spring-loaded cam jaw that prevents accidental release even without a load. Designed specifically for vertical lifting, these clamps are essential tools for fabrication plants, shipyards, and large-scale manufacturing facilities.

Technical Specifications

Safety Factor	4 : 1
Lifting Orientation	Vertical
Material	High-strength alloy steel

Features

Safety Features

- Spring-loaded safety lock
- Serrated cam jaw for high grip
- Anti-slip high-friction pads
- Pivoting shackle

Applications

Common Industries

Fabrication Plants • Shipyards • Construction Sites • Warehousing
