

Vertical Vacuum Packaging Machine

This vertical vacuum packaging machine is designed for industrial use. It features a chamber for vacuum sealing, a control panel with a pressure gauge and digital display, durable stainless steel construction, casters for mobility, and a transparent lid.

Product Overview

Industrial Vacuum Sealing Solution

This vertical vacuum packaging machine is engineered for robust industrial applications, providing reliable airtight sealing for a variety of products. Constructed from durable stainless steel, it features a transparent lid for precise process monitoring and an integrated control panel with a digital display and pressure gauge. Designed with mobility in mind, the unit is equipped with casters, making it a versatile choice for food preservation and other specialized packaging needs.

Key Features

Control Interface

- Digital Display
- Pressure Gauge

Material	Stainless Steel
Mobility	Yes
Lid Design	Transparent for process monitoring

Application

Primary Applications	Food Preservation, Industrial Packaging, Airtight Sealing
