

Vessel Support Trailer

This trailer is designed to support vessels during transport and storage. It features a two-tone hull and is equipped with chocks and securing straps.

Product Overview

Professional Vessel Transport Solution

The Vessel Support Trailer is a high-performance transport solution designed for the secure handling of medium-sized workboats and motor yachts. Engineered for stability and safety, this cradle-style trailer features integrated securing points and adjustable chocks to ensure the hull remains protected during transport or land-based storage. This unit provides a robust platform for shipyards and marine facilities looking to optimize their logistics.
