

VGA Audio Splitter 1 in 4 Out

This device splits a single input signal into four outputs. Each output consists of a VGA port and a set of audio ports, allowing connection to multiple displays or audio devices.

Product Overview

Professional VGA and Audio Distribution

This 1-in-4-out VGA audio splitter is designed for professional environments requiring reliable signal distribution. It allows a single VGA and audio source to be simultaneously displayed and heard across four separate output devices, such as monitors or specialized audiovisual equipment. With support for cascading, it offers flexible scalability for larger setups.

Technical Specifications

Configuration

1 VGA/Audio

Input Port

4 VGA/Audio

Output Ports

Connectivity

VGA, Analog Audio, Cascadable

Performance Features

Key Performance Indicators

- Low noise and distortion
- Wide bandwidth support
- Signal integrity maintenance
- Robust construction

Compatibility

Compatible Devices

TVs • Monitors • DVD Players • Specialized AV Equipment
