

VGA to S-Video RCA Converter Cable

This VGA to S-Video RCA converter cable connects a VGA output to a TV or display with S-Video or RCA inputs. It enables the display of content from a computer or VGA source on a standard TV screen.

Product Overview

VGA to TV Converter Cable

This versatile converter cable allows you to bridge modern VGA sources with classic display hardware. It facilitates seamless signal transmission from computer VGA outputs to televisions or monitors equipped with S-Video or RCA composite inputs. Designed for reliability in multimedia applications and presentations, this cable is a practical solution for integrating legacy display devices.

Technical Specifications

Input Interface	VGA (15-pin)
Output Interfaces	S-Video (4-pin mini-DIN), RCA Composite Video
