

VHF Wireless Dual Microphone System

This VHF wireless microphone system includes a receiver with dual antennas and two handheld microphones. The LCD panel on each microphone displays channel and battery status.

Overview

Professional Wireless Audio

The PV-2608 is a VHF wireless dual microphone system engineered for reliable and clear audio transmission in various settings. Featuring dual antennas for enhanced signal stability, this system is ideal for KTV performances, public speaking, and outdoor activities. Its robust frequency response and wide dynamic range ensure high-quality sound reproduction for professional environments.

Technical Specifications

Frequency Stability	0.005 %
Frequency Response	40Hz~20kHz
Maximum Deviation Range	30 KHz

Performance Metrics

Operating Distance

50 m
Minimum Range

Signal to Noise Ratio	80 dB
Audio Dynamic Range	80 dB
T.H.D	0.2 %

System Details

Receiving Power	AC220V
Modulation Mode	FM
Appropriate Situations	KTV Performance, Family Amusement, Outdoor Activities, Presentations
