

VHF/UHF Attic and Outdoor Antenna

This antenna is designed for receiving VHF and UHF signals. Its structural design and durable materials make it easy to install, anti-rust, waterproof, and weather resistant.

Overview

Professional Signal Reception

This versatile VHF/UHF antenna is engineered for both attic and outdoor installations, providing high-performance reception for Full HD and digital TV signals. Its professional structural design ensures durability against harsh weather conditions while maintaining easy installation. Featuring an integrated 4G filter and reflector panels, it effectively blocks interference to deliver clear, reliable signal transmission.

Performance Metrics

Frequency Range

174 MHz

VHF Low

230 MHz

VHF High

470 MHz

UHF Low

698 MHz

UHF High

VSWR Rating

- VHF: <2.5
- UHF: <2.5

Impedance

75 Ω

Design & Build

Installation Benefits

- Compact design for reduced freight and warehouse costs
- Easy-to-install structural design
- F-type connection for effective signal transmission

Key Features

Anti-rust, Waterproof, Weather Resistant, 4G Interference Filter, Split-type Main Rod
