

VHF/UHF Full Channel TV Antenna with Booster

This VHF/UHF antenna receives full channels and includes a booster for enhanced signal strength. It features two directors and two dipoles for good receptivity, along with full-direction 360° rotation.

Overview

High-Performance TV Reception

This VHF/UHF full-channel antenna is engineered for superior signal clarity and reliable performance. Featuring a robust multi-element array with two directors and two dipoles, it delivers high gain and low noise for a crystal-clear picture and audio experience. Designed for convenience, the unit includes full 360-degree remote-controlled rotation and a durable, rain-proof construction suitable for outdoor installation.

Technical Specifications

Design Features

- Two directors
- Two dipoles
- Low noise amplifier
- High gain

Reception Range	VHF/UHF Full Channel
Rotation	360° Full-direction
Control Method	Infrared Remote, Electrical Control

Durability & Installation

Weather Resistance

Rain Proof • Solid Structure

Installation	Easy for use and installation
