

VHF/UHF Full Channel TV Antenna with Booster

This VHF/UHF antenna receives full channels and includes a booster for enhanced signal strength. It features 360° rotation controlled by infrared remote, providing low noise, high gain, clear picture, and good voice quality.

Product Overview

High-Performance TV Reception

This VHF/UHF full-channel television antenna is engineered for superior signal clarity and reception. Featuring a robust multi-element array with two directors and two dipoles, it ensures high gain and low noise performance. Designed for durability, the unit is rain-proof and built for reliable outdoor installation.

Technical Specifications

Control System

- Infrared remote control
- Electrical controlled rotation
