

VHF/UHF TV Antenna with Booster

This VHF/UHF antenna receives full channels and includes a booster for enhanced signal strength. It features full-direction rotation controlled remotely and offers low noise with high gain.

Product Overview

High-Performance TV Reception

This VHF/UHF antenna is engineered to deliver superior signal reception across full channels. Featuring a robust, rain-proof structure with dual directors and dipoles, it ensures high gain and low noise for a consistently clear picture and audio quality. Designed for convenience, the system includes electrical 360° rotation controlled via an infrared remote, making it an ideal solution for areas with challenging signal environments.

Technical Specifications

Signal Range	VHF, UHF, Full Channel
Rotation	360° (Full-direction)
Control	Infrared remote control with electrical rotation
