

Vibratory Rammer

This vibratory rammer is used for compacting soil, gravel, and asphalt. It features a heavy-duty construction with a robust engine and durable ramming foot for efficient compaction.

Product Overview

High-Performance Compaction

This heavy-duty vibratory rammer is engineered for efficient soil, gravel, and asphalt compaction in demanding construction and landscaping environments. Built with a robust engine and a durable ramming foot, it delivers the consistent force required for professional-grade site preparation. The integrated protective frame ensures longevity and reliability on tough job sites.

Technical Specifications

Design Features

- Heavy-duty construction
- Protective frame
- Durable ramming foot
- Robust engine

Power Source

Gasoline

Primary Applications

Soil Compaction, Gravel Compaction, Asphalt Compaction, Landscaping
