

# Vibratory Sieve Separator for Food and Cereal

This high-capacity vibrating sieve separator is designed for efficient separation and grading of food products, beverages, and cereals. It utilizes a multi-deck system with adjustable vibration parameters to optimize performance.

## Overview

### High-Capacity Vibratory Sieve Separator

This high-capacity vibrating sieve separator is engineered for the efficient separation and grading of food products, beverages, and cereals. It features a robust multi-deck system with adjustable vibration parameters to ensure optimal performance across diverse industrial applications. Built with durable materials, the unit is designed for long-lasting operation in demanding environments and includes multiple discharge outlets for precise, categorized product collection.

## Technical Specifications

### Design Features

- Multi-deck system
- Adjustable vibration parameters
- Multiple discharge outlets
- Durable industrial construction

### Performance Metrics

**1 Adjustable**  
Vibration Control

**1 Multi-deck**  
System Type

### Suitable Applications

Grain Cleaning, Size Classification, Impurity Removal
