

Video Conference System with Auto-Tracking Camera and Delegate Microphones

This video conference system provides seamless communication and collaboration. It features an auto-tracking camera and delegate microphones for high-quality audio and video.

ADDITIONAL IMAGES

System Overview

Complete all-in-one system featuring auto-tracking camera technology for focused speaker capture.

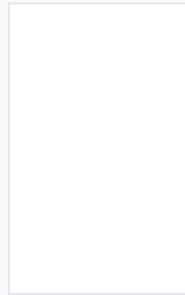

Intelligent Conference Solution

This all-in-one intelligent conference system integrates high-definition video conferencing, automatic camera tracking, and professional audio reinforcement into a single, cohesive unit. Designed for efficiency, it features an interactive electronic whiteboard and a built-in Android computer to streamline presentations and collaborative discussions. Ideal for small to medium-sized meeting rooms, it simplifies setup with one-button operation and wireless microphone capabilities.

System Capabilities

High-fidelity wireless gooseneck microphone designed for clear audio capture in meeting environments.

Stable and professional microphone base with integrated controls for enhanced meeting participation.

Integrated Functions

Auto-tracking Camera, Delegate Microphone System, Electronic Whiteboard, Conference Display, Sound Reinforcement, Integrated Android Computer

Usage & Environment

Room Suitability

25 sqm

Minimum Area

50 sqm

Maximum Area

Recommended Layout

Rectangular Conference Table

Usability

The interactive interface allows for seamless meeting management, including registration, broadcasting, and session control.
