

Villa WiFi Video Door Phone System

This WiFi video door phone system is designed for villa security. It features a weatherproof outdoor camera unit with night vision, multiple indoor monitor screens, smartphone connectivity for remote viewing and control, and RF-connected security accessories.

Product Overview

Villa Security Video Intercom

This advanced WiFi-enabled video door phone system provides comprehensive surveillance and remote access control for residential properties. Designed for security, the system features a weatherproof outdoor camera, mobile app connectivity for real-time video monitoring, and support for integrated RF security sensors. Users can easily manage access, respond to visitors, and unlock doors directly from their smartphones or the indoor monitor units.
