

Vintage CRT Television with Integrated Speakers

This vintage television features integrated speakers on either side of the screen. The TV's design suggests a CRT television from the late 20th or early 21st century.

Product Overview

Vintage Display Solution

This vintage television unit features a classic CRT design, blending nostalgia with functional audio-visual components. Equipped with integrated speakers mounted on both sides of the screen, it provides a self-contained display experience. The unit is built with a durable dark gray bezel and a stable silver-colored base, ideal for collectors or specialized display applications.
