

Vintage Style LED Filament Bulb

This LED filament bulb features a vintage-style design with visible filaments. It provides a warm, orange glow, creating an ambient lighting effect.

Overview

Vintage Aesthetic, Modern Efficiency

The BTT75 LED filament bulb offers the classic, warm appearance of traditional Edison-style lighting combined with the energy efficiency and longevity of modern LED technology. Designed for both decorative and functional use, this bulb features visible filaments that create an inviting ambiance. With multiple glass finish options and dimmable capabilities, it is a versatile choice for professional lighting installations.
