

Vital Signs Patient Monitor

This patient monitor delivers an excellent visual experience and intelligent operation. It provides accurate physiological measurements and smooth workflow, along with comprehensive connectivity options suitable for demanding hospital settings.

Overview

Clinical Excellence in Patient Monitoring

This advanced patient monitoring system is designed to provide a superior visual experience and intelligent operation in demanding hospital environments. It delivers accurate physiological measurements and supports a smooth clinical workflow. With comprehensive connectivity options, it is an ideal solution for operating rooms, intensive care units, and emergency departments.

Key Metrics

Real-time Physiological Data

80 bpm

Heart Rate

98 %

Oxygen Saturation

20 rpm

Respiration Rate

120 mmHg

Systolic BP

Clinical Applications

Suitable Clinical Settings

Operating Rooms, Intensive Care Units, Emergency Departments

System Features

Core Capabilities

- High-resolution waveform analysis
- Trend monitoring
- Visual and audible alarm system
- Comprehensive connectivity
