Product Overview

High-Performance Vortex Pump

This vortex pump is expertly engineered for the transfer of clean, non-corrosive liquids. Designed with high-precision components, it ensures consistent flow for applications such as tank filling, domestic water supply, and irrigation. Its robust construction features anti-rust treated castings and premium copper wiring for improved efficiency and longevity.

Technical Specifications

Suction Lift

8 m

Max Suction Lift

Operating Limits

Parameter	Limit
Max Working Pressure	6 bar
Max Liquid Temp	+35°C
Max Ambient Temp	+40°C

Key Features

Certifications

CE • RoHS • ISO9001 • ISO14001 • OHSAS18001

Material Highlights

100% Copper Wire, Cold-rolled silicon steel, Stainless steel nuts, Anti-rust castings

Applications

Recommended Applications

- Tank filling
- Domestic water supply
- Water transfer
- Pressure boosting
- Irrigation
