

VSI5X Vertical Shaft Impact Crusher

The VSI5X Sand Maker is a vertical shaft impact crusher designed for efficient sand production in mining and aggregate processing. It utilizes advanced crushing technology to produce cubical-shaped aggregates with excellent gradation.

Product Overview

High-Performance Sand Maker

The VSI5X Vertical Shaft Impact Crusher is a next-generation solution for industrial sand production. Designed with integrated crushing modes, this machine optimizes throughput and aggregate quality while maintaining structural durability. It features advanced hydraulic systems for simplified maintenance and improved part longevity in demanding aggregate processing environments.

Technical Specifications

Processing Capacity

70 TPH

Minimum Capacity

640 TPH

Maximum Capacity

Max Input Size

50 mm

Compatible Materials

Granite, Quartz, Basalt, Pebble, Limestone, Dolomite

Features and Maintenance

Maintenance Systems

- Semi-automatic hydraulic system
- Centralized lubrication system
- Optimized wear-resistant components
- Automatic overload protection

Crushing Modes

Sand Making • Shaping • Central Feeding • Fall Feeding
