Product Overview

High-Performance Surface Preparation

This vulcanized fiber abrasive disc is engineered for professional surface preparation on both metal and non-metal surfaces. Constructed with a durable vulcanized fiber backing and premium resin-over-resin bonding, it provides the strength needed for demanding industrial tasks. It is an essential tool for removing rust, paint, deburring, and polishing welding seams across diverse sectors.

Suitable Industries

Shipbuilding, Automotive, Aviation, Machinery, Bridge Construction, Building Construction

Technical Specifications

Abrasive Types

- Aluminum Oxide
- Silicon Carbide

Diameter Options

- 4 inch
- 4.5 inch
- 5 inch
- 6 inch
- 7 inch

Bonding Structure

Resin over Resin

Grit Range

16 to 220
