

VW-Audi Pixel Repair Circuit Board

This circuit board is designed to repair red display screens with unclear or missing pixels in VW-Audi vehicles. It includes voltage regulators, capacitors, resistors, and diodes, and features labeled connection points for installation.

Product Overview

Professional Pixel Repair Solution

This circuit board is engineered specifically to restore clear visibility to missing or unclear pixels on red dashboard displays. Designed for ease of installation, the repair process requires connecting only three lines to the existing PCB. This solution provides a reliable method for fixing display degradation in automotive instrument clusters.

Technical Specifications

Integrated Components

- Voltage Regulator (7805)
- Capacitor (470uF 25V)
- Capacitor (100uF 16V)
- Resistor (1.5k)
- Diode (IN5817)
- Diode (IN4001)

Durability

Conformally Coated

Wiring Connections

+12V, GND, S

Installation

Ease of Installation

Simple three-line connection
