

Walk-Behind Agricultural Tiller

This versatile agricultural machine is designed for tilling and soil preparation. It features adjustable tilling blades for various soil conditions and a handlebar for easy maneuverability.

Overview

Versatile Soil Preparation

This walk-behind agricultural tiller is engineered for efficient soil preparation in small to medium-sized farms and gardens. Featuring a robust single-cylinder diesel engine and heavy-duty traction wheels, it delivers reliable power for demanding tilling tasks. The adjustable tilling blades and depth control ensure precise operation tailored to various soil conditions, making it an essential tool for optimal planting preparation.

Technical Specifications

Engine Type	Single-cylinder diesel
Control System	Handlebar control
Tilling Depth	Adjustable

Key Features

Ideal For

- Small-scale farming
- Medium-sized farms
- Garden soil preparation

Primary Features

Heavy-duty traction, Adjustable blades, Compact design, Precision depth control
